The easiest way to save your energy

AI-powered energy intelligence, from individual buildings to entire cities

ninewatt

Rang Kim

COO

CEO

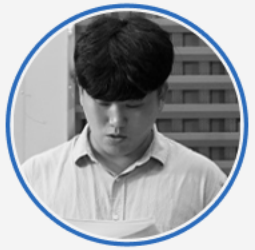
Youngrok Kim

Building energy specialist
with 10+ years experience
M.S. in U-City Engineering
Led 200+ building energy projects

CTO

Sanglin Park

AI engineer with 10+ years
at top Japanese AI lab
M.S. in U-City Engineering
Senior developer



CRO

Donghyuk Lee

Ph.D. in Building Energy Simulation
Former researcher at KTL, KICT
Adj. Professor at SKKU

COO

Rang Kim

M.S. in Architectural Engineering
Global project manager
with 4+ years in B2B biz dev.

Founded Year
2019

Number of Projects

~60 Projects

Major Investments

$3.5M

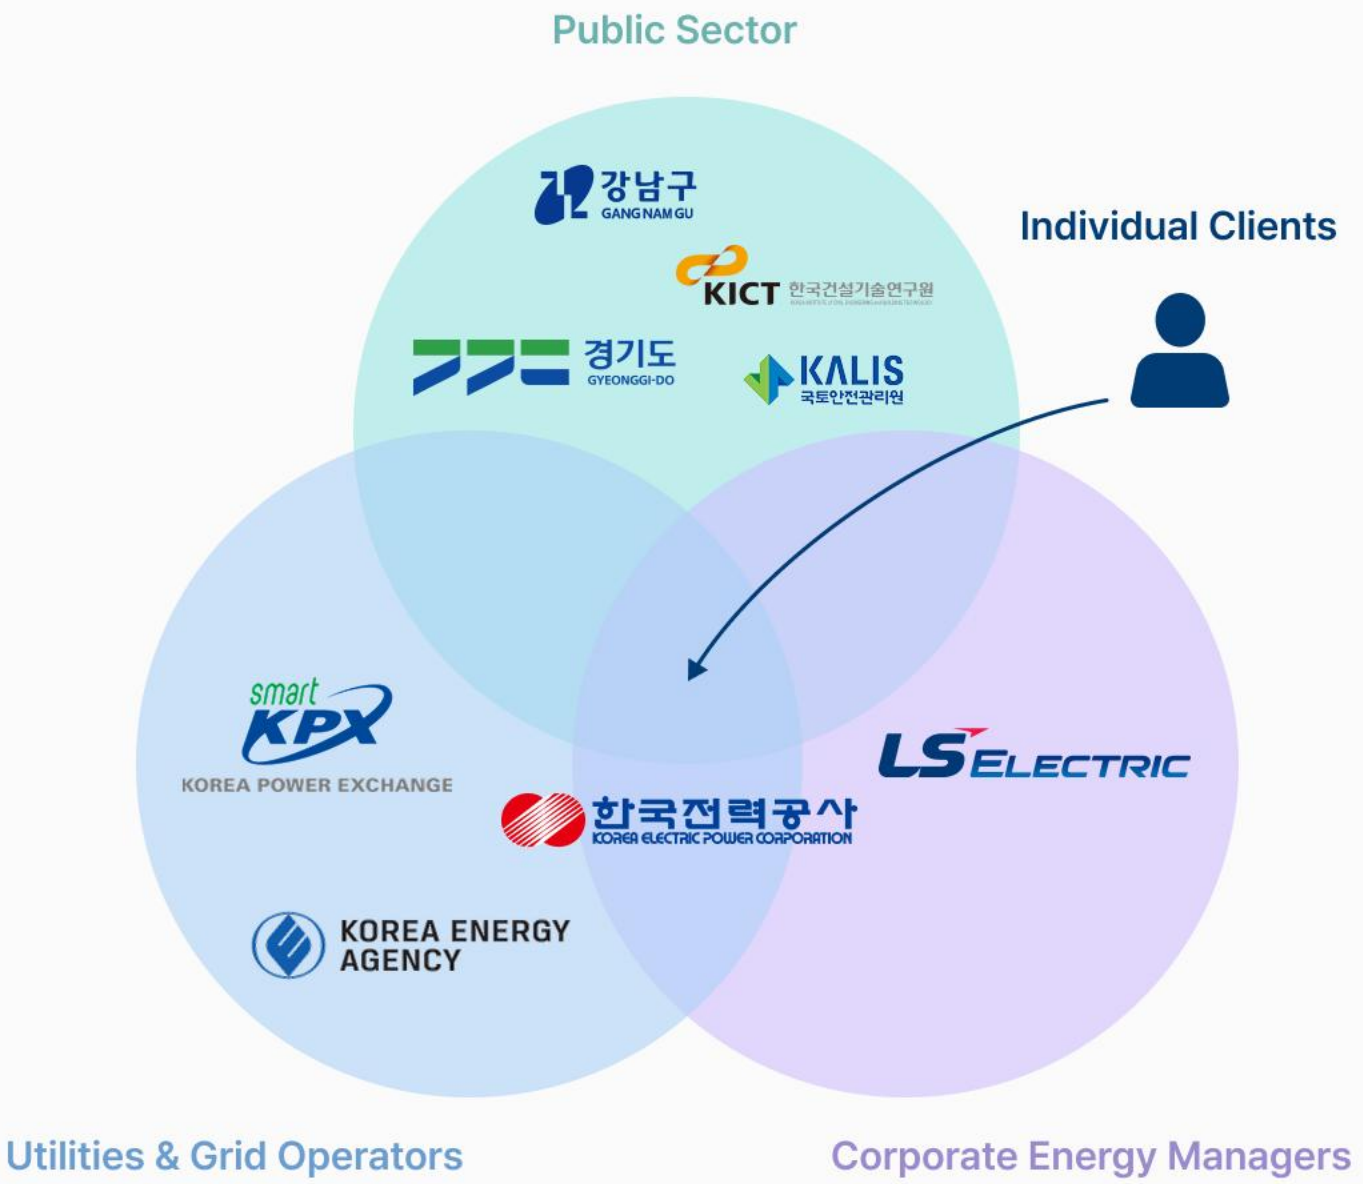
LS ELECTRIC
bluepoint
SID VENTURE PARTNERS
KODIT

Previous Year's Sales

$1.5M

Background

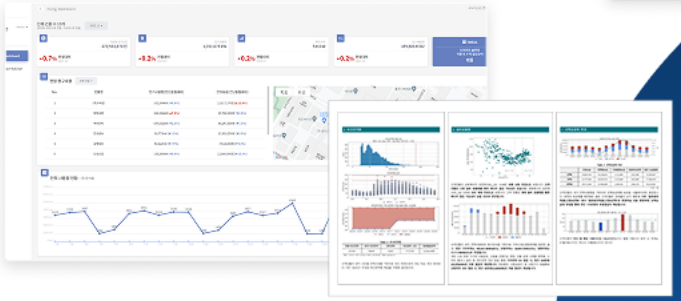
Buildings use **40%** of urban energy.
As costs rise and **rules tighten**, **smarter** solutions are needed—across public, private, and personal sectors.



Solution Overview

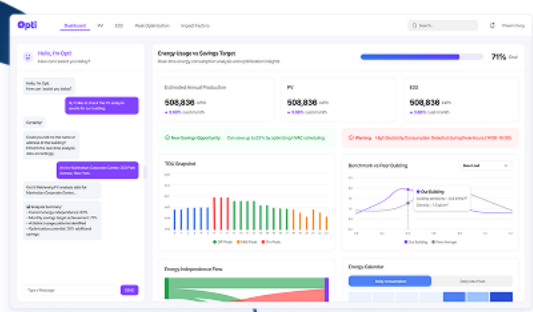
3. SAVE-E

Portfolio-Level Building Energy
Tracking and Saving Solution



4. Community ESS and PV

Renewable Energy Generation and
ESS Operators for Smarter Grids



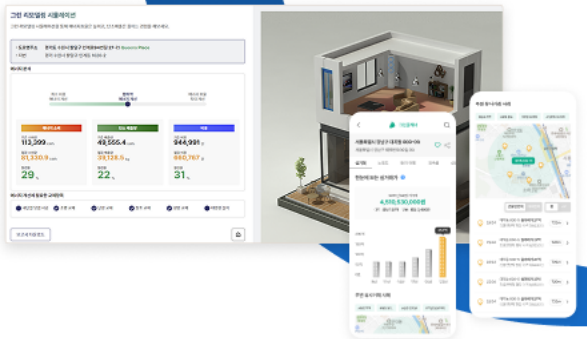
5. OPTI

Chat-Based Building Energy
Analysis and Saving Solution

NINEWATT'S SOLUTION

2. GREENPLANER

Open Data–Based Building
Retrofit Proposal Solution

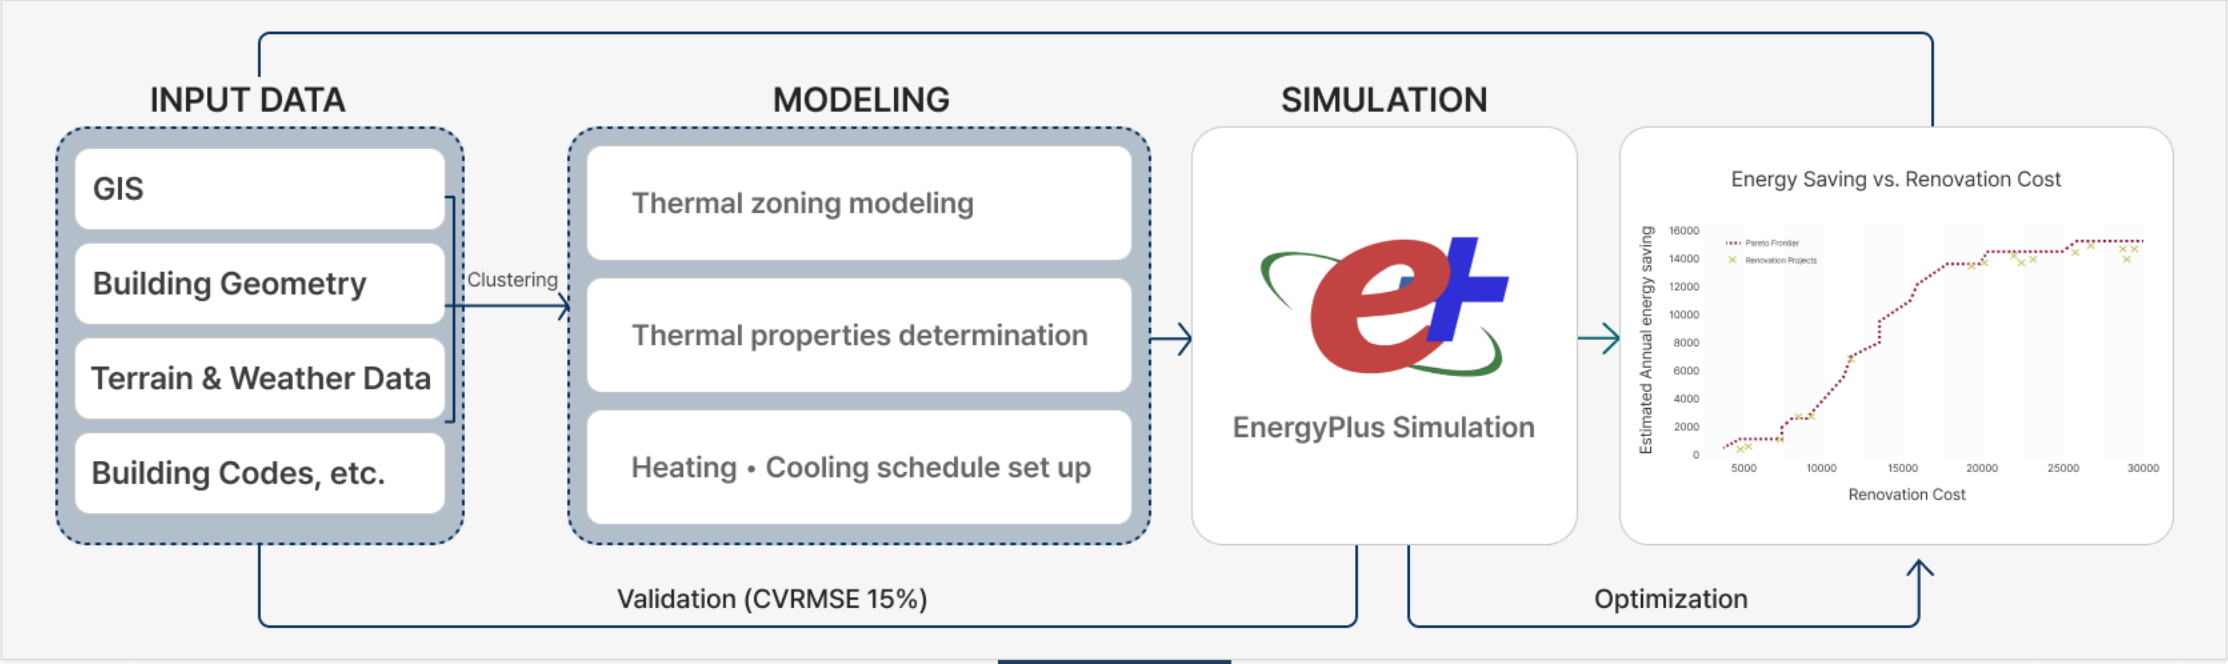


1. WATTI

Open Data-Based Building Energy
Performance Diagnosis Platform

City-Scale Building Energy Simulation (UBEM)

Automated Building Energy Modeling System · Technology enabling building energy insight in the city



OUTPUT

- Energy Performance diagnosis
- Visualization of Energy Use & CO_2 Emissions
- Remodeling Options
- Energy Bill Saving Potential
- Investment Impact Analysis

Traction

Adopted by governments, real estate, and end-users for green retrofit diagnostics.

Domestic Projects

12+

International Projects

UK, JP, FR, etc.

Accumulate earnings

$ 328,500

PV / ESS Installation Simulation

Automated ESS operation scheduling

Electricity Cost Reduction Analysis
(7 Tariff Algorithms)

Automated Report Generation

Applied over 200 buildings

(Office, Industrial complex, etc.)

Traction

Applied by public sector & ESCOs to reduce energy bills through simulation

Major Partners

LS Electric, KEPCO, etc.

Average Savings per year

~12%

Accumulate earnings

$ 150,000

Business Model & Use Cases

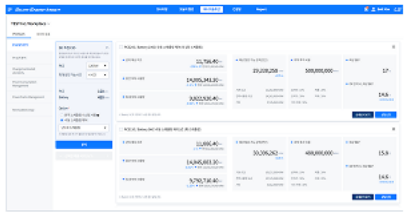
Energy Data Analysis & Optimization

System delivery + Platform service fee

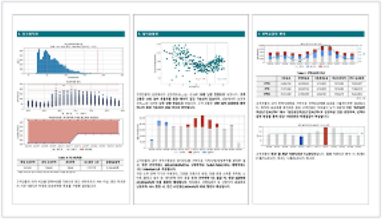
Consulting fees

Implementation Results

Gyeonggi Province



LS ELECTRIC



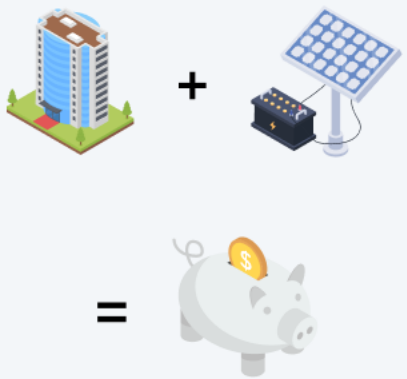
LS ELECTRIC R&D Campus Pilot

Commnuty Scale PV / ESS O&M

By operating PV & community shared ESS, Ninewatt contributes to the peak reduction and grid flexibility

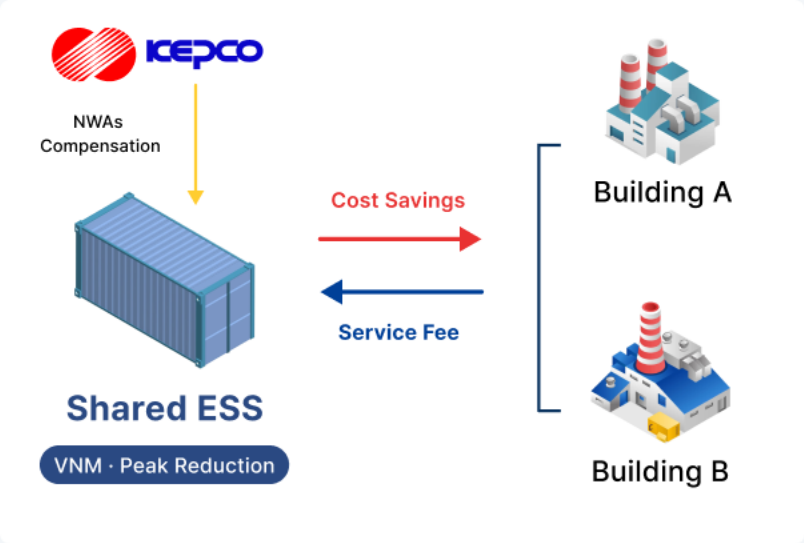
PV

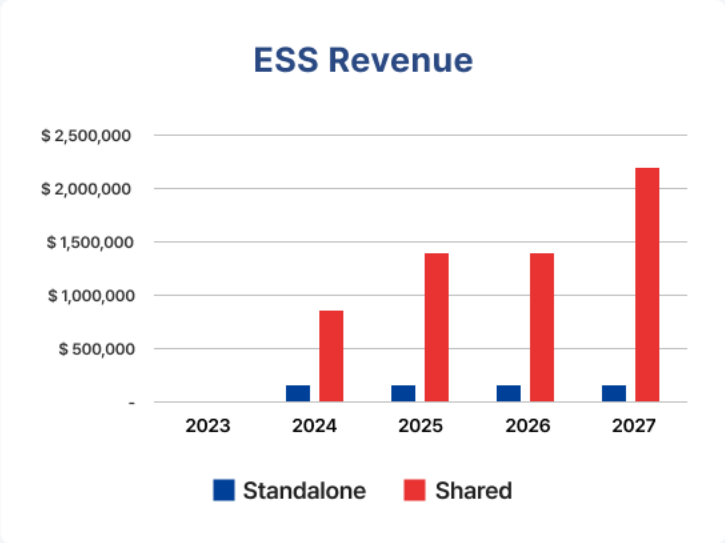
Reduce electricity costs & energy usage, maximize self-consumption



ESS

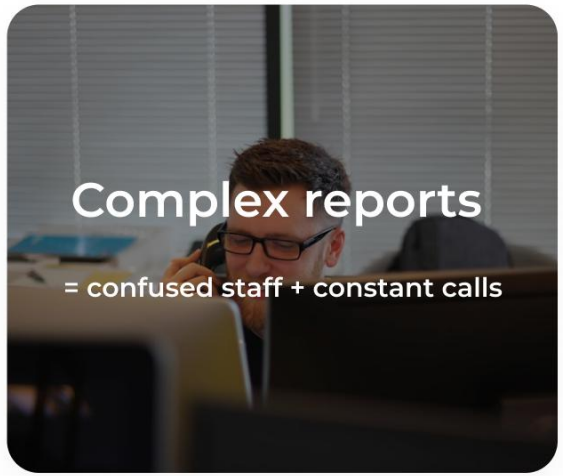
Reduce electricity costs & energy usage, maximize self-consumption



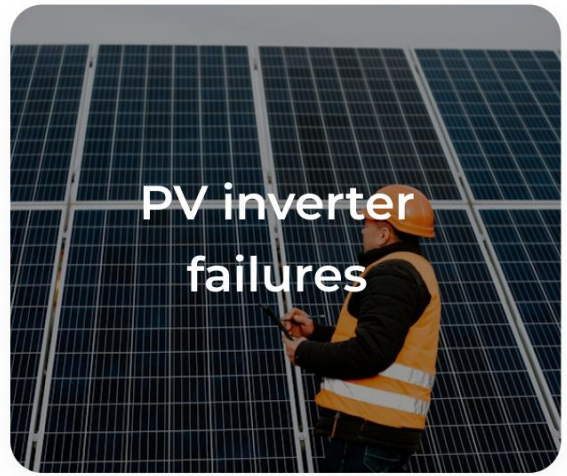


smart KPX KOREA POWER EXCHANGE · 한국전력공사 KOREA ELECTRIC POWER CORPORATION · Goyang · KOREA ENERGY AGENCY · 경기도 GYEONGGI-DO · KALIS 국토안전관리원

The Challenge



Employees cannot interpret them, leading to frequent phone calls



Manual tracking of generation and difficult handovers

Building owners and tenants cannot decide between “penalty vs. investment”

Plenty of data, but a lack of interpretation and actionable execution.

Opti

Facility Investment Simulation
(PV, ESS ROI Analysis)
